

# LUMIADOME Venue Partnership Prospectus | 2026 Season

# A Spectacular Attraction for Your Property — At No Cost to You

Lumiadome is a portable immersive entertainment venue — a 50-foot geodesic dome equipped with 360° projection, spatial audio, lasers, and atmospheric effects. We're seeking venue partners with outdoor space to host deployments during our 2026 season.

What we're proposing is simple: You provide space. We provide everything else — the dome, the equipment, the staff, the marketing, the operations, the insurance. We handle ticketing and audience management.

Your property gets a visually stunning attraction that draws attention, generates buzz, and brings new visitors to your location.

**There's no cost to you. No revenue expectations. No complicated arrangements.**

We're building something new, and we're looking for partners who want to be part of it.

# What Lumiadome Is

Inside the dome, audiences experience 60-90 minute shows that surround them with synchronized visuals, spatial audio, theatrical lighting, laser effects, and even scent. It's unlike anything most people have encountered — intimate (80-100 guests per show), immersive, and deeply memorable.

**Think of it as:** A portable concert hall, planetarium, and art installation combined — but unlike any of those things individually.

## Our Programming

- Electronic music experiences
- Ambient and meditation sessions
- Live performances with local and touring artists
- Educational and scientific visualizations
- Private events and special bookings

## The Technical Reality

System	What It Does
360° Projection	Four 6,000-lumen laser projectors create seamless imagery across the entire dome ceiling
Spatial Audio	16 channels of sound that moves through the space — 35,000+ watts
Laser System	Seven 6-watt RGB lasers creating three-dimensional beams and patterns
Theatrical Lighting	Moving heads, scanners, accent lighting for drama and atmosphere
Scent System	Timed aromas that enhance emotional response
Climate Control	Heating (175,000 BTU), cooling, ventilation — we operate rain or shine

**Total system replacement value: approximately \$200,000**

# What's In It for Your Venue

## A Visual Landmark

A 50-foot illuminated dome on your property is impossible to ignore. At night, with projection and lighting active, it becomes a beacon. We're also developing exterior projection capability — imagery visible on the outside of the dome that creates a landmark visible from a distance. People will notice. People will talk. People will come to see what it is.

## Marketing Reach You Don't Pay For

We invest in promoting our shows — digital advertising, social media, local press outreach, influencer engagement. All of that marketing mentions your location. Every ad we run, every post we make, every article written about us includes your venue name and drives awareness of your property. Our promotional spend becomes your free advertising.

## New Audiences Discovering Your Location

The people who come to Lumiadome may never have visited your property before. They're experience-seekers, typically 21-45, with disposable income and active social lives. Once they've been to your location for the dome, they know you exist. They've parked in your lot, walked your grounds, seen what else you offer. We bring foot traffic. What happens next is up to you.

# More Benefits for Your Venue

## Content and Coverage

A geodesic dome with immersive technology is inherently photogenic and newsworthy. Local media covers novel attractions. Visitors photograph and share their experiences. Your property appears in that content — tagged, mentioned, visible. You get user-generated content and press coverage without lifting a finger.

## Community Goodwill

Bringing something extraordinary to your community — something people couldn't otherwise access without traveling to major cities — generates goodwill. You become the venue that hosted that amazing dome thing. That association has value beyond any single transaction.

# What We Need from You

## Space Requirement

Specification	
Footprint	100' × 100' minimum clear area
Surface	Flat, firm ground — grass, concrete, asphalt, or compacted gravel
Duration	4-6 weeks typical deployment

## Utilities

Utility	Specification	Flexibility
Electrical	200-amp 3-phase service	Or we provide generator
Water	Standard hose connection	For climate control

## Coordination

- Point of contact for logistics and communication
- Cooperation on any required permits (we handle the paperwork and costs)
- Basic coordination with your existing operations and schedule

**That's it. We handle everything else.**

# What We Provide

## The Complete Operation

### **Dome structure**

15-meter geodesic frame, professional covering, flooring, acoustic treatment

### **All technical systems**

Projection, audio, lighting, lasers, scent, climate control

### **Setup and teardown**

Our crew, our equipment, our process

### **Staffing**

Technicians, operators, box office, guest services

### **Marketing**

Digital advertising, social media, press outreach, promotional materials

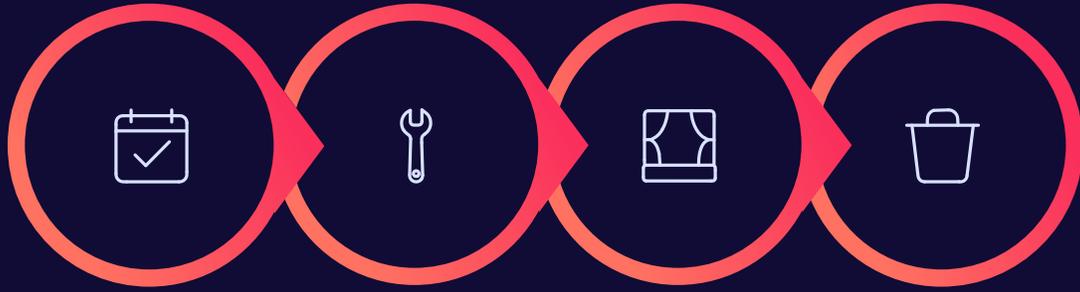

### **Ticketing**

Platform, payment processing, customer service

### **Insurance**

General liability (\$1-2M), equipment coverage (\$200K), workers' comp

# Timeline

Pre-arrival

Setup

Operation

Teardown

From initial planning to complete site restoration, we manage every phase of the deployment to ensure a seamless experience for your property.

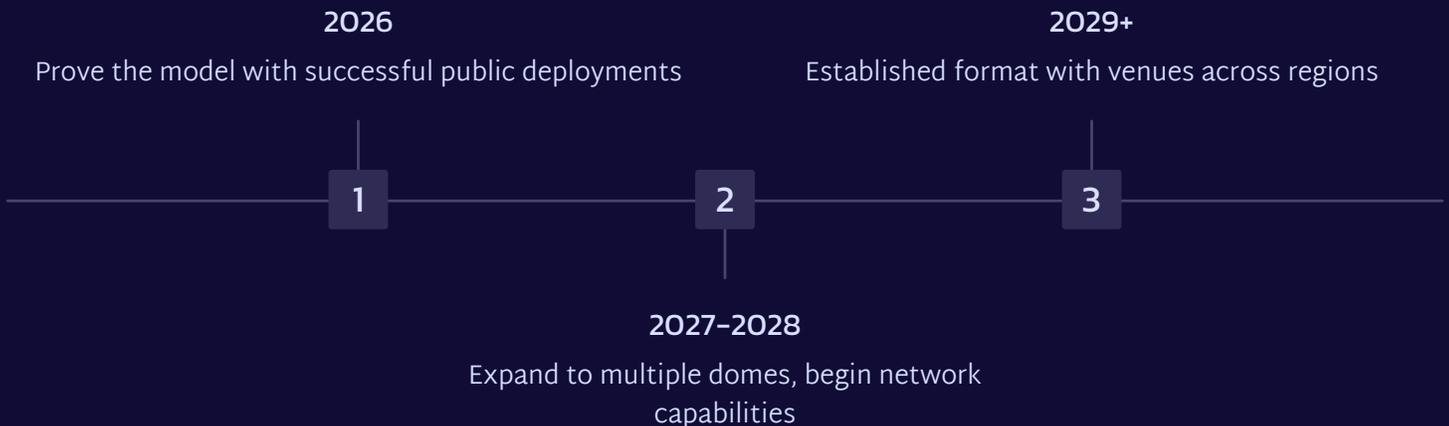

## What We're Building

Lumiadome is a new kind of entertainment format. Not a concert. Not a planetarium. Not a museum exhibit. Something different — intimate, immersive, communal.

We've built a professional-grade system with a replacement value of approximately \$200,000 — including the dome structure, projection system, lasers, spatial audio, lighting, and climate control. We've completed successful proof-of-concept deployments. Now we're ready to bring this to the public and prove that communities want this kind of experience.

**We're not asking you to bet on us. We're asking for space to prove our concept — and offering real value to your property in return.**

## Our Vision

**Partners who join us early become part of that story.** If this works — and we believe it will — you'll have been there from the beginning.

# Ideal Venue Partners

We work well with properties that have:

- Outdoor space that's currently underutilized or available seasonally
- Existing infrastructure — power access, parking, restroom proximity
- Compatible zoning — entertainment/assembly or special event permitted
- Reasonable noise tolerance — shows run evenings, acoustic treatment contains sound
- Interest in something different — willingness to try something new

## Types of Properties That Fit

- Parks and recreation facilities
- Fairgrounds and event spaces
- Agricultural properties and farms
- Commercial properties with available land
- Private estates and event venues
- Campgrounds and outdoor recreation areas
- Educational institution grounds
- Any property with flat outdoor space and a sense of possibility

# Frequently Asked Questions

## **Q: What's the catch? Why is this free for us?**

We're building a new business. We need venues to prove our concept works. The value exchange is simple: you provide space, we provide an attraction that benefits your property. We take the financial risk. If it works, we both win. If it doesn't, you've lost nothing but hosted something interesting.

## **Q: What if you don't sell tickets? What if it fails?**

That's our risk, not yours. We're not asking for guarantees or minimums. We show up, we operate, we leave the site as we found it. The worst case for you is a few weeks with a cool dome on your property that didn't draw as many visitors as hoped.

## **Q: How loud is it?**

Sound is contained within the dome. Acoustic treatment absorbs and isolates. From outside, you can barely tell a show is happening. We work within local ordinance requirements and can adjust programming to fit noise restrictions.

## **Q: What about liability?**

We carry comprehensive insurance — general liability (\$1-2M), equipment coverage (\$200K), and workers' compensation. We'll provide certificates of insurance and add your property as additional insured. Our agreement includes standard indemnification clauses protecting you.

## **Q: Can we do private events or host our own functions in the dome?**

Potentially, yes. Once operational, we can discuss scheduling private events or special programming that serves your needs. Details would depend on timing, logistics, and mutual interest.

# Next Steps

Interested? Here's how to proceed:

01

---

## Let's Talk

A 30-minute call to discuss your property, answer questions, and see if there's a fit.

02

---

## Site Visit

We'll come to you, walk the space, assess logistics, and provide specifics on how a deployment would work at your location.

03

---

## Simple Agreement

If we're both interested, we formalize with a straightforward agreement covering the basics — dates, responsibilities, insurance, mutual expectations.

04

---

## We Handle the Rest

Marketing launches, permits get filed, equipment arrives, dome goes up, shows begin.
